NECK LABELS — CUT & PRINT GUIDE

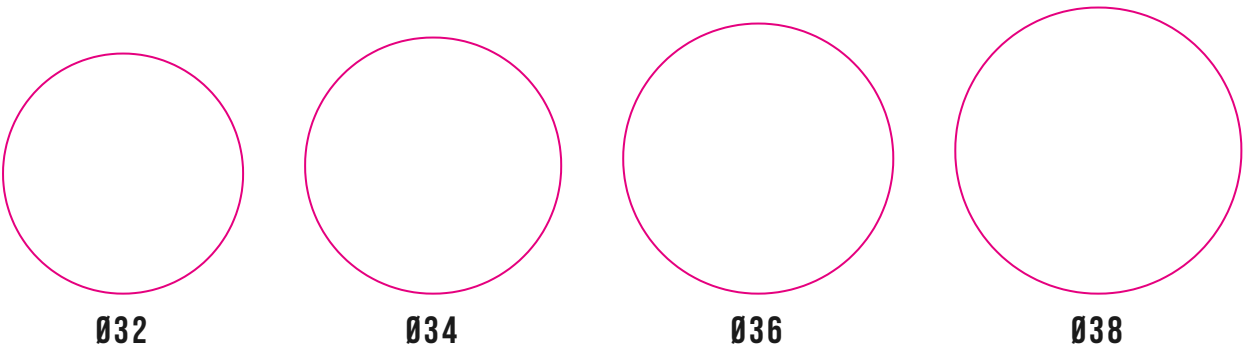

WINE & WHISKEY · 2026-08-24

1 · SPECIFICATION

Trim size	85 × 80 mm (landscape)
Neck hole	Ø 34 mm, top-centred, 5 mm from trim top
Slit	Straight cut from top edge to hole — <i>optional</i> , lets the label slip onto a bottle already on the shelf
Corners	square cut. Optional: round to R3 mm with a corner punch — the sheets are butted, so the guillotine cut is square
Layout	2 × 3 = 6 labels per A4 sheet, butted (no gutter)
Sheets	1 Bestseller · 2 New · 3 Special offer · 4 Last bottles · 5 Sommelier's choice
Stock	250–300 gsm matte card. Matte is required — the SPECIAL OFFER panel is written on by hand
Sides	single-sided (back stays blank white)
Colour	file is RGB — convert to CMYK for press
Print at	100 % / "Actual size". Do NOT use "Fit to page" — it changes the hole diameter

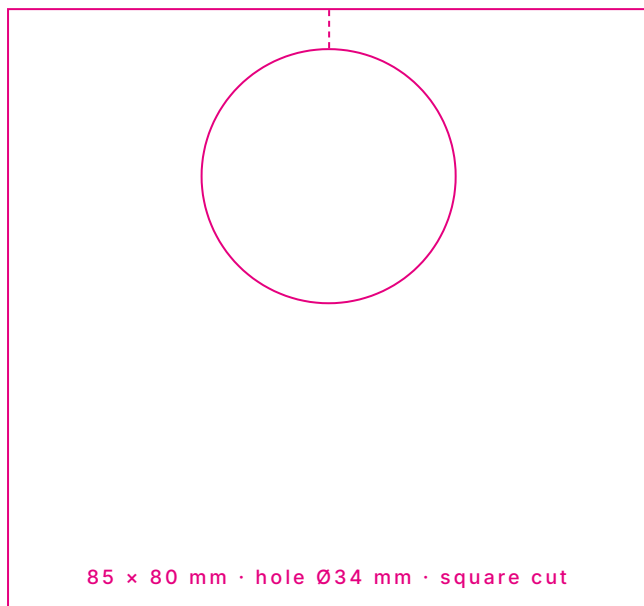

2 · FIT GAUGE — TEST BEFORE THE FULL RUN

Cut these rings out and slide them over your actual bottles. The previous batch used Ø27 mm and had to be trimmed by hand; these ship at Ø34 mm, which clears a standard still-wine capsule. If sparkling bottles need more, tell us the winning diameter and we re-issue the file.

DIE-LINE – ACTUAL SIZE

85 × 80 MM · HOLE Ø34 MM · MAGENTA = CUT, DOES NOT PRINT

Solid magenta = trim & hole (die-cut or punch).

Corners are square; round them to R3 mm with a corner punch if you want a softer look.

Dashed magenta = optional slit from top edge to hole.

Hole centre sits 22.0 mm from the trim top, on the vertical centreline.
