WHY THIS WORKS FOR A SHISHA LOUNGE

—**Dry** — the workhorse. G&T, Negroni, neat over ice between sessions.

—**Pink** — the photo pour. Pairs naturally with fruit-forward tobaccos (berry, melon, peach).

—**Blue** — the talking point. Colour-change with tonic; works the room without a cocktail program.

—The case mix lets you stock all three without committing to three full cases — one delivery, no dead inventory.

03 · VODKA · THE LONG-PULL POUR

VODKA FOR THE LONG PULL.

The shisha sit-down asks for clean, cold, neutral spirits between rounds. Three brands, two formats each — from the friendly opener to the top-shelf pour for a long table. **0.7 L for the standard table, 1 L for the long sit.**

WHY THIS CURVE

—**Ladoga** opens the night — friendly price, easy to mix.

—**Czars Original** is the house pour: a clean wheat vodka the room can lean on for cocktails or shots.

—**Czars Gold "Царская"** is the upsell when the table asks "what's your best vodka?" — a real premium pour without leaving the portfolio.

—**1 L format** on every brand — for the long-sit table. Better unit cost, one bottle on the table instead of two.
