NECK LABELS — CUT & PRINT GUIDE

WINE & WHISKEY · 2026-08-24

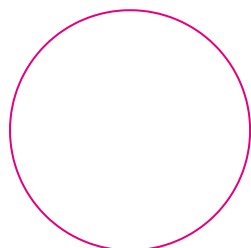

1 · SPECIFICATION

Trim size	85 mm wide × 88 mm tall
Neck hole	Ø 38 mm, top-centred, 4 mm from trim top
Slit	Straight cut from top edge to hole — <i>optional</i> , lets the label slip onto a bottle already on the shelf
Fold	CREASED / SCORED ACROSS THE FULL WIDTH, 47 MM FROM THE TRIM TOP — must be a proper score, not just a bend line, or 300 gsm card will crack
Collar / panel	above the score = 47 mm collar that sits on the neck; below = 41 mm panel that folds forward and faces the shopper
Corners	square cut. Optional: round to R3 mm with a corner punch — the sheets are butted, so the guillotine cut is square
Layout	2 × 3 = 6 labels per A4 sheet, butted (no gutter)
Sheets	1 Bestseller · 2 New · 3 Special offer · 4 Last bottles · 5 Sommelier's choice
Stock	250–300 gsm matte card. Matte is required — the SPECIAL OFFER panel is written on by hand
Sides	single-sided (back stays blank white)
Colour	file is RGB — convert to CMYK for press
Print at	100 % / "Actual size". Do NOT use "Fit to page" — it changes the hole diameter

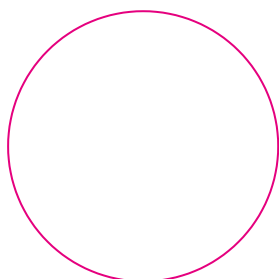

FIT GAUGE — TEST BEFORE THE FULL RUN

PRINT THIS PAGE AT 100 % · REFERENCE ONLY, NOT PART OF THE RUN

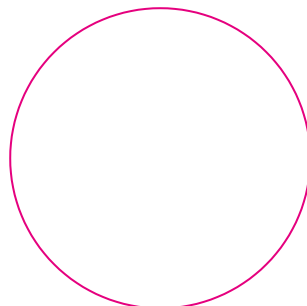

Cut these rings out and try them on your actual bottles. What the hole has to clear: still-wine lip Ø29–31, sparkling with the muselet Ø34–35, whisky screw cap Ø33–38, whisky stopper Ø40–48 mm. These labels ship at **Ø38** plus a 2 mm slit — the slit does the real work: the label snaps on sideways, so the hole only has to match the neck it rests on, not the widest cap. Tell us the ring that wins and we re-issue the file.

DIE-LINE — ACTUAL SIZE

85 × 88 MM · HOLE Ø38 MM · MAGENTA = CUT, CYAN = SCORE — NEITHER PRINTS

Solid magenta = trim & hole (die-cut or punch).

Cyan dashed = **CREASE / SCORE LINE**, 47 mm from the trim top, full width.

Corners are square; round them to R3 mm with a corner punch if you want a softer look.

Dashed magenta = optional slit from top edge to hole.

Hole centre sits 23.0 mm from the trim top, on the vertical centreline.

HOW IT GOES ON THE BOTTLE

- 1 · Slip the collar over the neck through the hole (or snap it on sideways through the slit).
- 2 · Fold the panel forward on the score, roughly 100–120°.
- 3 · Let the panel rest on the shoulder of the bottle — it now faces up and out, readable head-on from the shelf instead of curling flat around the glass.
